

# WCAG 2.1 AA Level Web Accessibility Audit

Website: tarapools.com | Verdict : Compliant! | Date: January 28, 2021

#	Requirement	Relevant	Successes	Failures	Score
1	Making use of an accessibility interface helps to ensure that visually impaired users can adjust some of the UI and the design (font-size, colors, spacing, etc.) to their needs. It is not a compliance requirement, but can help to improve compliance.	Yes	Pass	-	100%
2	Ratings/scores that are represented visually using stars, meters or other indicators should either have an "aria-label" attribute or a screen-reader only texts conveying the score/rate.	No	0	0	-
3	Breadcrumbs main element should include a "role" attribute that equals to "navigation" and an "aria-label" attribute that describes the functionality."	No	0	0	-
4	Visually deleted texts (often used to show a previous price of a sale) should include an "aria-label" attribute or a screen-reader only text that explains this is deleted text.	No	0	0	-
5	Iframe elements should include a "title" or an "aria-label" attribute explaining the purpose, the functionality or the destination of the iframe, or be tagged hidden for screen-readers if irrelevant.	Yes	Pass	-	100%
<b>Code snapshots of some successful elements</b>					
<ul style="list-style-type: none"><li><code>&lt;iframe width="1000" height="563" src="https://www.youtube.com/embed/Du_2VLGIR8k?v=Du_2VLGIR8k&amp;disablekb=1" frameborder="0" allowfullscreen="" uk-responsive="" class="uk-responsive-width" style="height: 563px;" tabindex="0" aria-label="Youtube If...</code></li></ul>					
6	Tables that are missing a THEAD row with TH elements, should include a "role" attribute that equals to "rowheader" on the TD elements of the TR that represents the visual table headings.	No	0	0	-

# WCAG 2.1 AA Level Web Accessibility Audit

Website: tarapools.com | Verdict : Compliant! | Date: January 28, 2021

7	Tables that are being used as layout structures should include a "role" attribute that equals to "presentation" to indicate to screen-readers that it is not really a table.	No	0	0	-
8	If nested tables are used (a table element within a table cell), set the nested tables "role" attribute to "presentation".	No	0	0	-
9	HTML title elements (H1-6) should have texts. If images or links are used, they should include an alternative or screen-reader only text.	Yes	14	0	100%
10	An H1 title provides information to blind-users using screen-readers of what the main topic of the page is and each page should have exactly one H1 title.	Yes	Pass	-	100%

## Code snapshots of some successful elements

- `<h1 class="el-title uk-h1 uk-text-muted uk-margin-top uk-margin-remove-bottom aldicy8pyctq" > OPTIONS FOR<br role="none">YOUR BACKYARD </h1>`

11	Elements that visually appear as titles but are coded with a non-heading HTML Tag should include a "role" attribute that equals to "heading" or have their tags fixed.	No	0	0	-
12	Title levels should not be skipped and should be built with consistent hierarchy. For example: you cannot have "h4" titles and "h2" titles without having "h3" titles.	Yes	Pass	-	100%
13	Menus should either be built using the HTML5 "nav" element or include a "role" attribute that equals to "menu" or "navigation" to indicate a navigation landmark for screen-readers.	Yes	Pass	-	100%

## Code snapshots of some successful elements

- `<nav class="uk-navbar" uk-navbar="{&quot;align&quot;:&quot;left&quot;,&quot;boundary&quot;:&quot;!uk-navbar-container&quot;}" role="presentation"><div class="uk-navbar-left"> <a href="https://tar...`

----	--	----	---	---	---

# WCAG 2.1 AA Level Web Accessibility Audit

Website: tarapools.com | Verdict : Compliant! | Date: January 28, 2021

21	Every page should include hidden links that by clicking on them (either using keyboard navigation or a screen-reader), the user will "skip" certain blocks directly to main landmarks such as main content, menu or footer.	Yes	Pass	-	100%
22	Interactive elements that can be navigated using the keyboard should be surrounded by a visual outline whenever they are focused.	Yes	Pass	-	100%
23	Elements that are hidden using CSS manipulations (opacity, height, text-indent, off-canvas, etc.) should be wrapped inside an element with an "aria-hidden" attribute that equals to "false", or include it directly, and have it dynamically changed to "true" when they become visible.	No	0	0	-
24	Interactive elements such as links, buttons and form fields should all be navigable using the keyboard by either using a focusable element (a, button, input, etc.) or including the "tabindex" attribute that equals to "0".	Yes	Pass	-	100%
25	Elements that are hidden using CSS manipulations (opacity, height, text-indent, off-canvas, etc.) should include a "tabindex" attribute that is below 0, and have it dynamically changed to 0 when they become visible.	No	0	0	-
26	Background images that are not just for decoration purposes and should have the same treatment as standard images and include a "role" attribute that equals to "img" and an alternative text description in an "aria-label" attribute.	No	0	0	-
27	Font icons, SVG or images that are being used as spacers, decorations or their purpose is already described by the content should include a "role" attribute that equals to "presentation" or "none".	Yes	Pass	-	100%

- ``
- `<head><meta name="acsbClient" content="true"><meta content="https://tarapools.com" name="acsbAceBase"><meta content="https://acsbase.com/apps/ace/" name="a...`

33	The meta viewport tag should allow visually impaired users to pinch-zoom at least double the standard scaling using the user-scalable="yes" and maximum-scale={2 or higher} content strings.	Yes	Pass	-	100%
----	--	-----	------	---	------

## Code snapshots of some successful elements

- `<meta name="viewport" content="width=device-width, initial-scale=1">`

34	The title tag of the HEAD section (also the title that appears in the browser tab and Search Engine result pages) should exist and describe the name of the current webpage for screen-reader users.	Yes	Pass	-	100%
----	--	-----	------	---	------

## Code snapshots of some successful elements

- `<title>Home | NEW PATTERNS</title>`

35	Landmarks such as main content and footer should be built using their corresponding HTML5 element or include a description using an "aria-label" attribute and a "role" tag that equals to "contentinfo" or "main". Landmarks such as search and navigation are tested in other sections.	Yes	2	0	100%
----	---	-----	---	---	------

## Code snapshots of some successful elements

- `<div class="uk-panel uk-margin-remove-first-child options uk-margin uk-width-large" id="page#5-0-0-1" data-acsb-main="true" role="main"> <h1 class="el-title uk-h1 uk-text-mu...`

# WCAG 2.1 AA Level Web Accessibility Audit

Website: tarapools.com | Verdict : Compliant! | Date: January 28, 2021

- `<div id="footer#0" class="uk-section-default uk-section " data-acsb-page-footer="true" role="contentinfo" aria-label="Footer"> <div class="uk-container uk-container-expand">...`

36	The validity status of every form element must be represented in the code at all times using the "aria-invalid" attributes and the "true/false" values, and change dynamically when the status changes.	No	0	0	-
37	Form fields should either include an "aria-label" attribute or a connected LABEL element describing the requirement of the field (email, phone, name, etc.).	No	0	0	-
38	Required form fields should include an "aria-required" attribute that equals to "true" so blind users using screen-readers know their validation.	No	0	0	-
39	aria-describedby and aria-labelledby attributes should be connected by ID to an element that either has text description or an "aria-label" attribute.	No	0	0	-
40	All forms should have a submission button that is built as an input type "submit" or a "button" element, or include a "role" tag that equals to "button". Buttons can be hidden if the form can be submitted using the Enter key.	No	0	0	-
41	Search forms should include a "role" tag that equals to "search" (or be wrapped by one) to indicate a search landmark for screen-readers.	No	0	0	-
42	Form elements cannot have the same ID, or else their corresponding label will provide false information.	No	0	0	-
43	Font sizes should be at least 11px in size in order to stay readable in the majority of font families. This should be verified also when using dynamic units such as REM or percents.	Yes	Pass	-	100%

# WCAG 2.1 AA Level Web Accessibility Audit

Website: tarapools.com | Verdict : Compliant! | Date: January 28, 2021

44	Elements that have texts should meet a minimum contrast ratio of 4.5:1 between their foreground (usually text color) and background color.	No	0	0	-
45	Letter spacing should not be set to below -1px in order to stay readable in the majority of font families. This should be verified also when using dynamic units such as REM or percents.	Yes	Pass	-	100%
46	A common accessibility mistake is to treat carousels as live regions using the "aria-live" attribute and the "polite" or the "assertive values. Using this practice will cause screen-readers to cut and skip announcements.	No	0	0	-
47	Control elements such as next and previous icons should include an "aria-label" attribute or a screen-reader only text that explains the functionality to screen-readers.	No	0	0	-
48	Carousel pagination items (usually used as small dots at the bottom of the carousel) should indicate their functionality and slide number they control using an "aria-label" and a screen-reader only text.	Yes	23	0	100%
